

Field: "Add Driver Licence"

If the user doesn't add their driver licence, they won't be able to reserve a car.

By default, the "Add Driver Licence" field is empty. When the user clicks on the field, the "Add Driver Licence" window will appear. The user needs to input their first name, last name, date of birth, and driver's licence number. The text that the user inputs is in black.

When the user inputs all the data, the following message appears: "Thank you! The documents have been sent for verification.

We will get back to you with the result shortly." The "Got it" button is below the message. If the user clicks on the "Got it" button, the window will close, and a 30-second timer will appear in the "Add Driver Licence" field. After 30 seconds, the system will inform the user if the documents were approved.

Restrictions on the "Add Driver Licence" Field

Field	Field Type	Valid Values	Mandatory
First Name	Text Field	Only Latin letters, one space, and one hyphen. Lengths should not be less than 2 and greater than 14 symbols. If the user doesn't meet any of the requirements, the field will be marked in red, and the following error message will appear: "Enter a correct name."	<input checked="" type="checkbox"/>
Last Name	Text Field	Only Latin letters, one space, and one hyphen. Lengths should not be less than 2 and greater than 14 symbols. If the user doesn't meet any of the requirements, the field will be marked in red, and the following error message will appear: "Enter a correct last name."	<input checked="" type="checkbox"/>
Date of Birth	Numbers	Format dd.mm.yyyy. Only numbers. Constraints for dd - from 01 to 31 inclusive. Constraints for mm - from 01 to 12 inclusive. Constraints for yyyy - from 1880 to 2006 inclusive. Periods are automatically inserted when the user inputs their date of birth and removes the focus. The system doesn't allow inserting other symbols or numbers that don't comply with the requirements.	<input checked="" type="checkbox"/>
Driver Licence Number	Numbers	Format nn nn nnnnnn. Only numbers. Constraints for nn - from 01 to 99, including this value. Constraints for nnnnnn - from 000001 to 999999 inclusive. Spaces are automatically inserted when the user inputs the number and removes the focus. The system doesn't allow inserting other symbols or numbers that don't comply with the requirements.	<input checked="" type="checkbox"/>
